Book Cover & Spine Reference Catalog

13 books identified from the supplied shelf image, arranged alphabetically by title (ignoring “The”). Each entry includes the exact spine crop from your uploaded design, a clean front-cover reference tile, title/author metadata, and a Codex-ready object.

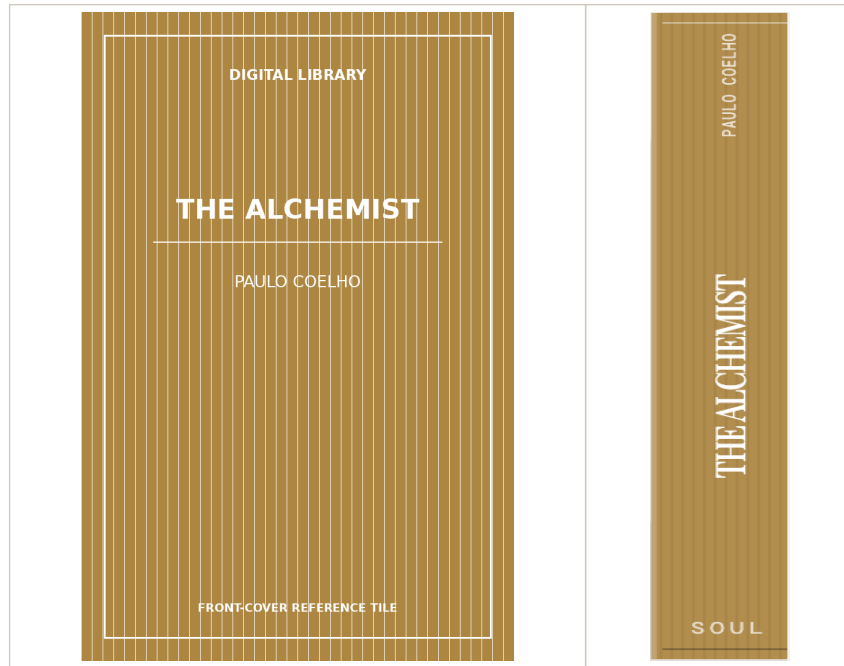

Image note: spine images are direct crops from your uploaded artwork. The front-cover tiles are original prototyping references derived from the shelf palette, not reproductions of publisher cover artwork. For production, replace each front tile with a licensed or user-owned cover image while keeping the filenames/data structure shown here.
